

SEAN FOR VICE PRESIDENT

ACADEMIC EXPERIENCE

A Union of Students – For Students

Community Connections

Students should feel safer, and more **at home** in their schools and faculties, thus helping them form **vital connections** that aid in their **academic experience**.

Student Locations

I want to continue the excellent work on **student space**, creating **common rooms** for all schools, perfect for building **communities** within schools and societies, especially as **event locations**.

Teaching Innovation

Modern teaching must be **accessible** for **all** students, and schools should receive incentives to **reward** empowering, creative and inventive **teaching**. Finally, assignments should be school-specific, fairly marked, and appropriately weighted.

Better Communication

Kent students are not kept as **informed** as they should be. The University and Union must improve in getting **clear information** to all students, and not just through occasional emails.

Medway Inclusion

For too long have Medway students felt detached and isolated from the main campus. All UKC students **belong**. I want Medway students to be **included**, and not left behind – **again**.

Your Decisions

Students are not **engaging** with the union, as it appears pointless. I want students at the **forefront** of all **decisions** relating to them, then showing them how **their voices mattered**.

Sean

Psychology student who has been the elected School Rep for two years. My experience with the Union has shown me limitations, but also its **potential**, and I believe I am the best candidate to take our academic **experience** towards it. Students **are** the Union – I will always follow that **principle**.
